MEETING REPORT

Working Group (WG) 10
13- 16th December 2023
Paris, France

Standards Discussed

- ISO/IEC 18013-1
- ISO/IEC 18013-2
- ISO/IEC 18013-3
- ISO/IEC 18013-4
- ISO/IEC 18013-5
- ISO/IEC 18013-6
- ISO/IEC 18013-7
- ISO/IEC TS 7367
- ISO/IEC TR 19446

Next Meeting

- March 2024, Raleigh North Carolina

Discussion and outcomes of WG10

Vehicle Registration Certificate

Building on the generic mdoc document concept established by ISO/IEC 18013-5, a Technical Specification for a digital vehicle registration certificate is being created (ISO/IEC TS 7367). The group made good progress in documenting the data set for such a certificate.

mDL Test Methods

The group processed comments on Working Draft 5 of ISO/IEC TS 18013-6, a technical specification for test methods for documents produced under ISO/IEC 18013-5.

Over-the-Internet mDL presentation protocol

The group agreed on the final content for ISO/IEC TS 18013-7, the technical specification for securely sharing mDL information over the Internet. In its current form this Technical Specification provides solid solutions while at the same time recognizing the rapid evolution of this space (e.g. identity credential browser APIs).

Decision

- The group has agreed 18013-7 to move to Technical Standard (TS) Ballot
- The meeting agreed to move Section 3 of the Informative Annex: Protocol Considerations, into the Technical Report (TR) that will be attached to the Ballot
